Microsoft Office Product Key Not Working: Troubleshooting and Solutions

Frustrated with a Microsoft Office product key that won't activate? Don't panic! This comprehensive guide will help you understand common issues and find solutions to get your Office suite up and running. A non-functioning Microsoft Office product key can be a major inconvenience. Whether you're trying to activate a new installation or reactivate an existing one, encountering errors can be frustrating. There are several reasons why your key might not work, ranging from simple mistakes to more complex issues. This guide will cover the most common causes and provide practical solutions to help you resolve the problem.

Understanding the Problem: Why Your Office Key Might Not Work

Before diving into troubleshooting steps, it's crucial to understand why your Microsoft Office product key might be failing to activate. Here are some of the most common reasons:

- **Invalid or Incorrect Key:** A simple typo can render your key unusable. Ensure you entered the key correctly, double-checking each character.
- **Used on Too Many Devices:** Most Microsoft Office licenses allow activation on a limited number of devices. If you've exceeded the allowed limit, you'll need to deactivate the software on one or more of the existing devices.
- **Expired License:** Some Microsoft Office products come with limited-time licenses. If your license has expired, you'll need to renew it to continue using the software.
- **Incorrect Version:** Your product key might be designed for a specific version of Microsoft Office (e.g., 2019, 2021, 365). Ensure you're trying to activate the correct version of the software.
- **Software Piracy:** Using a pirated or unauthorized product key is a violation of Microsoft's terms of service and may lead to software malfunctions or security risks.
- **Activation Server Issues:** Occasionally, Microsoft's activation servers might experience temporary outages, leading to activation problems.
- **Corrupted Installation:** A corrupted installation of Microsoft Office can prevent the software from activating.

Troubleshooting Steps: Resolving Your Office Key Activation Issues

Now that you understand the potential causes, let's delve into troubleshooting steps to help you resolve the issue:

- 1. Verify the Product Key:**
 - **Double-check the key for typos:** Carefully review each character in your product key, comparing it to the original source (e.g., the product packaging, email confirmation).
 - **Check the key length:** Microsoft Office product keys are typically 25 characters long. Ensure your key has the correct number of characters.
- 2. Check Your License:**
 - **Review your license agreement:** Verify the terms of your license, including the number of devices allowed and the expiration date.
 - **Contact your vendor:** If you purchased your Office license from a third-party vendor, contact them for information about your license terms.
- 3. Deactivate Office on Other Devices:**
- **Sign in to your Microsoft Account:** Visit the Microsoft account website and sign in using the account associated with your Office

license. • **Manage your installations:** Navigate to the "My Devices" or "My Software" section and deactivate Office on any devices you no longer need to use it on. **4. Install the Correct Version:** • **Verify your Office version:** Check the product packaging or your purchase confirmation email for the specific version of Office you purchased (e.g., Office 2019, Office 2021, Office 365). • **Download the correct installer:** Visit the Microsoft website and download the installer for the corresponding Office version. **5. Troubleshoot Activation Server Issues:** • **Wait for a few hours:** Temporary outages of Microsoft's activation servers are infrequent but can occur. Try activating your Office again later. • **Contact Microsoft Support:** If the issue persists, reach out to Microsoft Support for assistance. They can help you determine if there's a server-side problem or if there's an issue with your specific account. **6. Repair or Reinstall Office:** • **Repair your Office installation:** This process checks and repairs any corrupted files, which may fix the activation issue. Open "Control Panel" > "Programs and Features," select Microsoft Office and click "Repair." • **Reinstall Office:** If repairing doesn't solve the problem, a clean reinstall might be necessary. Before reinstalling, back up your data and then uninstall Office completely from your computer. Download the latest installer from the Microsoft website and install Office again.

Microsoft Office Product Key Not Working? Here's How to Troubleshoot and Fix It

So, you've just invested in Microsoft Office, or maybe you're trying to reinstall it on a new machine, and you're met with that dreaded error message: "Your Microsoft Office product key is not working." It's frustrating, to say the least. You've paid for the software, and now you're stuck staring at a trial version or a completely non-functional suite of essential productivity tools. Don't despair! This is a common issue, and more often than not, there's a straightforward solution. In this comprehensive guide, we'll dive deep

into why your Microsoft Office product key might not be working and, more importantly, how to fix it. We'll cover everything from simple checks to more involved troubleshooting steps, ensuring you get back to creating, calculating, and presenting in no time.

Understanding Why Your Microsoft Office Product Key Might Be Invalid

Before we jump into solutions, let's briefly touch upon the common reasons why a product key might be flagged as invalid or not working:

1. **Typos and Input Errors:** This is by far the most frequent culprit. A single misplaced character, a swapped number for a letter, or an extra space can render your key unusable.
2. **Incorrect Edition or Version:** Product keys are specific to the version of Office they were purchased for (e.g., Office 2019 Home & Business vs. Office 365 Personal). Using a key for the wrong edition will result in an error.
3. **Already Activated or Used:** Most retail product keys are designed for a single activation on a limited number of devices. If the key has already been used up to its limit, or if it was part of a volume license that has expired or been de-activated, it won't work for a new installation.
4. **Digital Licenses and Microsoft Accounts:** Modern Office installations often tie to your Microsoft account (digital license). If you're trying to activate with a product key that was previously associated with a different account, or if there's a sync issue, it can cause problems.
5. **Region-Specific Keys:** Some product keys are region-locked. If you purchased Office in one country and are trying to activate it in another, it might not be recognized.
6. **Volume License Misunderstandings:** If you're dealing with a volume license key (often used by businesses), there are specific activation procedures (like KMS or MAK) that need to be followed, and a standard retail activation won't work.
7. **Corrupted Installation Files:** In rare cases, the issue might not be with the key itself but with the Office installation files on your computer.
8. **Issues with the Microsoft Activation Server:** Sometimes, the problem lies with Microsoft's end – a temporary server outage or maintenance can prevent valid keys from being activated.
9. **Fake or Illegitimate Keys:** Unfortunately, the internet is rife with unauthorized resellers selling invalid or pirated product keys. If you obtained your key from a questionable source, this is a very likely reason.

Now that we have a better understanding of the potential issues, let's get down to fixing them.

Step-by-Step Troubleshooting for a Non-Working Microsoft Office Product Key

We'll start with the simplest solutions and move towards more complex ones. It's always best to go through these steps methodically.

1. Double-Check Your Product Key Entry

This might sound obvious, but it's the most common reason for a product key failure.

1. **Carefully Re-enter the Key:** Go back to the prompt where you entered the product key. Slowly and deliberately type it in again.
2. **Pay Attention to Similar Characters:** Common mistakes include confusing:
 1. 0 (zero) with O (letter O)
 2. 1 (one) with I (capital i)
 3. 5 with S
 4. B with 8
 5. G with 6
3. **No Dashes? Add Them:** Microsoft product keys are typically in a 5x5 format (25 characters). Ensure you're entering them with hyphens/dashes between groups of five characters, like XXXXX-XXXXX-XXXXX-XXXXX-XXXXX. If your key doesn't have them, add them.
4. **Remove Extra Spaces:** Make sure there are no leading or trailing spaces before or after the key.

2. Verify the Correct Office Version and Edition

Are you absolutely sure the product key you have is for the version of Office you're trying to install or activate?

1. **Check Your Purchase Confirmation:** If you bought Office online, review your email confirmation or account history from the seller.
2. **Examine the Packaging:** If you bought a physical copy, check the box or card for the specific Office title (e.g., Office Home & Student 2021, Office Professional Plus, Office 365 Business).
3. **Trial Versions vs. Paid Versions:** If you previously had a trial version installed, ensure you're using a key for a full retail or subscription version.

3. Activate Online vs. Offline

Sometimes, the activation method can make a difference.

1. **Online Activation:** The most common method. Ensure you have a stable internet connection.
2. **Phone Activation:** If online activation repeatedly fails, Office offers a phone activation option. During the activation wizard, look for an option like "I want to activate over the phone" or a link to call Microsoft support. Follow the automated prompts.

4. Link Your Product Key to Your Microsoft Account (Digital Licenses)

For most modern Office versions (Office 2013 and later, and all Microsoft 365 subscriptions), the product key is a one-time use code that links your license to your Microsoft account.

1. **Redeem Your Key First:** If you haven't already, you need to redeem your product key at `setup.office.com`. This process associates your key with your Microsoft account.

2. **Sign in with the Correct Account:** When installing or activating Office, make sure you sign in with the **exact same** Microsoft account you used to redeem the product key.
3. **Check Your Account Services & Subscriptions:** Log in to your Microsoft account on their website and navigate to "Services & subscriptions." You should see your purchased Office products listed there. If you don't, you might need to re-redeem your key or contact support.

5. Try Reactivating or Reinstalling Office

Sometimes, a clean slate can resolve activation issues.

1. **Deactivate Previous Installations (if applicable):** If you've reached your device limit, you might need to deactivate Office on older computers. You can often manage your activated devices through your Microsoft account's "Services & subscriptions" page.
2. **Uninstall Office Completely:** Use the Microsoft Support and Recovery Assistant (SaRA) tool for a clean uninstall. You can download it from Microsoft's official website. This tool ensures all Office-related files and registry entries are removed, preventing conflicts.
3. **Reinstall Office:** After uninstalling, download the latest version of Office from your Microsoft account portal (`account.microsoft.com`) and install it.
4. **Attempt Activation Again:** Once reinstalled, try activating using your product key or by signing in with your Microsoft account.

6. Contact Microsoft Support

If you've tried all the above and are still facing issues, it's time to reach out to the experts.

1. **Be Prepared:** Before contacting support, have your product key, your Microsoft account email address, proof of purchase (receipt or order number), and details about your Office version ready.
2. **Official Support Channels:** Visit the Microsoft Support website. They offer various contact methods, including chat, phone, and community forums.
3. **Specific Product Key Issues:** When you contact them, clearly explain the error message you're receiving and the troubleshooting steps you've already taken.

7. Common Error Messages and What They Mean

Understanding the specific error message can sometimes point you in the right direction.

1. **"The product key you entered is not valid."** This is a generic error usually indicating a typo, an incorrect key format, or an invalid key.
2. **"This product key cannot be used with this edition of Office."** You're trying to activate the wrong version or edition of Office.
3. **"This product key has already been used the maximum number of times."** Your key has reached its activation limit. You might need to deactivate a previous installation or purchase a new license.
4. **"We can't find that product key."** This often happens if you're trying to activate with a key that

hasn't been redeemed to your Microsoft account yet, or if there's a system issue.

8. What if You Bought a Key from a Third-Party Seller?

This is a tricky area. While some third-party sellers offer legitimate keys at discounted prices, many sell invalid, region-locked, or stolen keys.

1. **Check the Seller's Reputation:** If you bought from a reseller, investigate their refund policy and reputation.
2. **Contact the Seller First:** If you suspect the key is invalid, try contacting the seller for a replacement or refund.
3. **Microsoft Won't Help with Illegitimate Keys:** Be aware that Microsoft support generally cannot assist with product keys obtained from unauthorized sources, as they cannot verify their legitimacy.

Preventing Future Microsoft Office Product Key Issues

Once you've successfully activated Office, here are some tips to avoid similar problems down the line:

1. **Keep Your Product Key Safe:** Store your product key in a secure, accessible place. If you redeemed it to your Microsoft account, your account itself becomes the primary record.
2. **Opt for Digital Licenses:** Whenever possible, purchase Office directly from Microsoft or authorized retailers that offer digital licenses tied to your Microsoft account. This simplifies reinstallation and activation immensely.
3. **Understand Your License:** Know whether you have a perpetual license (e.g., Office 2021) or a subscription (Microsoft 365). This affects how you manage and reactivate your software.
4. **Regularly Update Office:** Keeping your Office applications updated can also prevent compatibility issues that might indirectly affect activation.

A non-working Microsoft Office product key can be a significant hurdle, but with a systematic approach to troubleshooting, most issues can be resolved. Remember to be patient, double-check your entries, and don't hesitate to leverage Microsoft's support resources if you get stuck. Getting your Office suite up and running is crucial for productivity, and by following these steps, you'll be back to creating documents and managing spreadsheets in no time!

Navigating the Challenge of Microsoft Office Product Key Issues When using Microsoft Office, encountering a situation where a product key fails to activate can be frustrating and disruptive, especially for professionals, students, and small business owners who rely heavily on these tools for productivity. A non-functional product key can halt access to essential applications such as Word, Excel, PowerPoint, Outlook, and Teams, undermining workflow efficiency and collaboration. Understanding the underlying causes, common troubleshooting steps, and available solutions is crucial to restoring access quickly and maintaining seamless digital operations.

Understanding Why Product Keys Fail to Activate A Microsoft Office product key is meant to verify licensing and unlock full functionality, but activation issues often stem from multiple factors. One common reason is a typo or digital input error—even a single incorrect character can prevent the key from validating. Another frequent cause is using a key that has expired, been shared improperly, or belongs to a different version or licensing tier. Additionally, internet connectivity problems during activation, especially on unstable or slow networks, can disrupt key validation. Some users encounter errors due to incorrect installation, such as partial deployments or conflicts with legacy software. In rare cases, digital entitlement issues related to Microsoft's cloud-based licensing models may trigger activation failures, particularly when account verification or entitlement synchronization stalls.

Practical Troubleshooting and Resolution Strategies To address a malfunctioning product key, several effective steps can be taken. First, verify the key itself by double-checking for typos and confirming it matches the correct edition—such as Office 365, Office 2021, or a specific suite like Microsoft 365 Business Basic. Ensuring the key is entered accurately in all uppercase letters avoids confusion. Next, assess your connection: a stable, high-speed internet link is essential for real-time validation. Restarting the Office application or switching networks can resolve temporary glitches. For persistent errors, using the Microsoft Activation Troubleshooter—available through Windows Settings—can detect and fix common issues automatically. In more complex cases, reactivating through Microsoft's official support portal offers a reliable path, allowing users to revalidate their license or request a replacement key. For organizations, implementing centralized license management tools ensures consistent activation across multiple users and devices, reducing administrative overhead.

Broader Applications and Long-Term Benefits Beyond immediate

functionality, understanding product key activation deepens users' relationship with Microsoft's licensing ecosystem. Proper key management not only prevents downtime but also ensures compliance with licensing agreements, protecting against legal risks and unauthorized access. For professionals, uninterrupted access to Office tools means sustained productivity, timely project delivery, and effective communication. Businesses benefit from streamlined operations, secure data handling, and scalable deployment of productivity solutions. Moreover, mastering activation processes empowers users to troubleshoot independently, reducing dependency on support teams and fostering a more confident digital workforce.

Looking Ahead: The Future of Microsoft Office Licensing and Activation As Microsoft continues to evolve its cloud-based licensing model, the future of Office activation is shifting toward more dynamic, seamless experiences. Innovations in artificial intelligence and real-time entitlement verification promise faster, more accurate key validation with minimal user input. The integration of secure digital entitlements and enhanced cloud synchronization aims to eliminate outdated activation hurdles. Additionally, proactive user education and improved support tools will empower individuals and organizations to navigate licensing complexities with greater ease. This evolution not only simplifies access but also strengthens security, ensures compliance, and supports a more flexible, efficient digital work environment for all users.

Microsoft Office Product Key Not Working: Troubleshooting and Solutions

Encountering a "Microsoft Office product key not working" error can be a frustrating experience, especially when you're trying to activate your software or install it on a new machine. This common issue can stem from a variety of sources, ranging from simple typos to more complex activation server problems. As a professional journalist, I understand the importance

of getting your productivity tools up and running smoothly. This comprehensive guide will delve deep into the potential causes of your Microsoft Office product key not working and provide actionable solutions to get you back to work.

Whether you're using Microsoft 365, Office 2021, Office 2019, or an older version, the underlying activation mechanisms share similarities.

Understanding these processes is key to troubleshooting. A product key, also known as a license key or activation code, is a unique alphanumeric string that verifies your purchase and grants you access to use the Microsoft Office suite. When this key fails to validate, it usually triggers an error message, leaving users unable to activate or even use their purchased software.

Common Reasons Why Your Microsoft Office Product Key Might Not Be Working

Before we dive into solutions, let's explore the most frequent culprits behind a non-functional Microsoft Office product key. Identifying the root cause is the first step towards resolving the problem efficiently.

1. Typos and Incorrect Entry

This might seem obvious, but it's surprisingly common. Product keys are long and complex. A single misplaced character, a swapped numeral, or even a missing hyphen can render the key invalid. Always double-check your entry for accuracy.

2. Incorrect Version or Edition of Office

Microsoft offers various versions and editions of Office (e.g., Home & Student, Home & Business, Professional Plus). A product key for Office 2019 Home & Student, for instance, will not work for Office 2021 Professional Plus. Ensure the key you're using corresponds to the exact version and edition of Office you are attempting to activate.

3. Key Already Used or Activated on Too Many Devices

Most Microsoft Office licenses have a limit on the number of devices they can be activated on simultaneously. If you've already used your key on the maximum allowed number of computers, subsequent activation attempts will fail. This is particularly relevant for perpetual licenses like Office 2021.

4. Expired or Invalid Product Key

While less common for purchased keys, some promotional or trial keys can expire. If you acquired your key through a limited-time offer, it might no longer be valid. Additionally, keys purchased from unofficial or unauthorized resellers are often illegitimate and will not work.

5. Regional Restrictions

In some instances, product keys can be region-locked. A key purchased in one country might not be valid for activation in another. This is usually a concern when purchasing software from international online marketplaces.

6. Microsoft Activation Server Issues

Occasionally, the problem might not be with your key at all, but with Microsoft's activation servers. These servers are responsible for validating product keys. If they are experiencing downtime or technical difficulties, you might encounter activation errors even with a valid key.

7. Corrupted Office Installation

A corrupted installation of Microsoft Office on your computer can sometimes interfere with the activation process, leading to product key errors. This is less about the key itself and more about the software's inability to correctly process it.

8. Using a Volume License Key Incorrectly

Volume license keys are intended for organizations and businesses purchasing multiple licenses. If an individual tries to use a volume license key for a personal installation, it may be flagged as invalid.

Troubleshooting Steps: Getting Your Microsoft Office Product Key to Work

Now that we've identified the potential causes, let's walk through the most effective troubleshooting steps. Following these sequentially should help you pinpoint and resolve the issue with your Microsoft Office product key.

Step-by-Step Solutions for "Microsoft Office Product Key Not Working"

1. Double-Check and Re-enter Your Product Key

The simplest solution is often the most effective. Carefully re-enter your 25-character product key into the activation prompt. Pay close attention to distinguishing between similar characters like '0' (zero) and 'O' (capital letter O), and '1' (one) and 'l' (capital letter l). Ensure hyphens are in the correct positions.

Tip: If you have the product key on a physical card or in an email, try copying and pasting it to avoid manual entry errors.

2. Verify Your Office Version and Edition

Confirm that the product key you have matches the version and edition of Microsoft Office you're trying to install or activate. Check your purchase confirmation email, the product packaging, or your Microsoft account for this information. If you purchased from Microsoft, log in to your Microsoft account to view your purchase history and associated product keys.

3. Check Your Microsoft Account for Existing Licenses

For Microsoft 365 subscriptions and many perpetual license purchases, your product key is linked to your Microsoft account. Log in to your account at account.microsoft.com. Navigate to the "Services & subscriptions" section to see your purchased Office products and their activation status. You can often re-download and reinstall Office from here without needing the original product key.

4. Deactivate Office on Previous Devices

If your key is showing as already in use on too many devices, you need to deactivate it on the older machines. You can usually do this through your Microsoft account online (as mentioned above) or by opening any Office application on the old device, going to File > Account, and clicking "Sign out" or "Deactivate product."

5. Contact Microsoft Support

If you've exhausted the above steps and your Microsoft Office product key is still not working, it's time to contact Microsoft Support. They have the tools to investigate your product key, check its validity, and assist with activation issues. Be prepared to provide them with your product key, purchase details, and any error messages you're receiving. Their support portal is a valuable resource for [Microsoft Office support](<https://support.microsoft.com/en-us/office/troubleshoot-product-activation-errors-364c6a70-334d-46f8-a771-4a08f5496a3e>).

6. Repair Your Office Installation

A corrupted Office installation can hinder activation. You can repair Office by following these steps:

- 1. Go to Control Panel > Programs > Programs and Features.**
- 2. Find your Microsoft Office installation in the list.**
- 3. Click on it and select "Change."**
- 4. Choose "Quick Repair" first. If that doesn't work, try "Online Repair" (which requires an internet connection and takes longer).**

7. Consider Purchasing a New Product Key (If Necessary)

If your product key is genuinely invalid, expired, or was purchased from an unauthorized source, the only solution is to purchase a legitimate Microsoft Office product key. Always buy directly from Microsoft or authorized retailers to avoid further issues. Explore options like Microsoft 365 for a subscription-based model or a new perpetual license if that suits your

needs better.

8. Check for Activation Server Status

While rare, Microsoft's activation servers can experience issues. You can sometimes find information about service outages on Microsoft's official status pages or tech news outlets. If there's a known server problem, you may just need to wait and try activating again later.

Preventing Future "Microsoft Office Product Key Not Working" Issues

To avoid the frustration of a non-working product key in the future, consider these preventative measures:

- 1. Purchase from Authorized Sources:** Always buy Microsoft Office directly from Microsoft or reputable retailers. Avoid unofficial websites offering heavily discounted product keys, as these are often illegitimate.
- 2. Keep Records of Your Purchase:** Store your product key and purchase confirmation details in a safe place, both digitally and physically.
- 3. Understand License Terms:** Be aware of the terms of your Office license, especially the number of devices it can be activated on.
- 4. Use Your Microsoft Account:** Link your Office purchases to your Microsoft account. This simplifies management, re-installation, and troubleshooting.
- 5. Regularly Update Office:** Keeping your Office applications updated can sometimes resolve underlying bugs that might affect activation.

Microsoft 365 vs. Perpetual Licenses: Understanding Activation Differences

It's important to note the distinction between Microsoft 365 (a subscription service) and perpetual licenses like Office 2021. While both use product keys for initial setup, their ongoing activation works differently.

Microsoft 365 Activation:

Microsoft 365 primarily relies on your Microsoft account for activation. Once you redeem your initial product key (if purchased separately), your

subscription is linked to your account. You then sign in with your Microsoft account credentials to activate Office on any compatible device. This makes it easier to manage activations across multiple devices and often involves less direct product key entry after the initial redemption.

Perpetual License Activation (e.g., Office 2021):

With perpetual licenses, you purchase the software outright, and the product key is crucial for a one-time activation (or a limited number of activations depending on the license). While you can often link these keys to your Microsoft account for easier management, the product key itself plays a more direct role in the activation process for each new installation.

When All Else Fails: Reinstalling Microsoft Office

If you've tried all the troubleshooting steps and are still facing issues, a clean reinstallation of Microsoft Office might be necessary. This involves completely uninstalling Office from your computer and then reinstalling it using your product key or Microsoft account credentials. This can resolve deep-seated installation conflicts that might be preventing activation.

To uninstall Office, use the Microsoft Support and Recovery Assistant tool, which can be downloaded from Microsoft's official website. This tool ensures a thorough removal of all Office components.

Conclusion: Resolving Your Microsoft Office Product Key Woes

Dealing with a "Microsoft Office product key not working" error can be a significant roadblock to productivity. However, by systematically working through the troubleshooting steps outlined in this article, you can often resolve the issue. Remember to start with the simplest solutions, such as double-checking your key entry, and gradually move towards more complex steps like contacting support or reinstalling the software. Keeping your purchase records organized and buying from authorized sources are the best preventative measures. With a little patience and the right approach, you'll have your Microsoft Office suite up and running again in no

time.

Questions & Answers About microsoft office product key not working

No	Question	Answer
1	My Microsoft Office product key isn't activating my software. What are the most common reasons for this, and how can I fix it?	Common reasons include typos, using a key for the wrong Office version or region, or the key already being in use. Double-check your entry for errors, ensure the key matches your downloaded version, and try accessing your Microsoft account to see if your Office is already linked there. If it's a new purchase, contact the seller or Microsoft support.
2	I bought Office online and the product key just won't work. Is there a way to verify if my product key is legitimate before I contact support?	You can often check the legitimacy of a key by visiting the official Microsoft 'Redeem your product key' page. If it's valid, it should lead you to download or sign in to your Office account. If it's rejected or flagged as invalid, it's likely not legitimate or already used.
3	My Office product key worked before, but now it says it's invalid. What could have happened, and what's my next step?	This can happen if the key was associated with a volume license that's expired, or if it was incorrectly activated on too many devices. Your best bet is to contact Microsoft Support directly. They can investigate the key's history and provide guidance or a replacement if appropriate.
4	I'm trying to install Office and the product key is giving me an error. Should I try reinstalling Office or just focus on the key?	Focus on troubleshooting the product key first. Reinstalling Office won't fix an invalid or blocked key. Ensure you're using the correct Microsoft account linked to your purchase, and that you're entering the key exactly as provided. If the key remains problematic, Microsoft support is the next step.
5	What if I bought a used computer with Microsoft Office already installed, and the product key they gave me doesn't work?	Product keys are typically single-use licenses tied to the original purchaser. If the previous owner didn't transfer the license properly or used it themselves, the key likely won't work for you. You'll probably need to purchase a new Office license or consider a Microsoft 365 subscription.
