2. **Defining Roles and Permissions:** Real Garant likely offers a role-based access control system. Create roles (e.g., Receiver, Picker, Supervisor, Administrator) and assign specific permissions to each role. For instance, a receiver might have permission to log in incoming goods, while a picker can only view assigned picking tasks.
3. **Assigning Users to Roles:** Once roles are defined, assign each user to their appropriate role.

Warehouse Configuration

Accurately mapping your warehouse within Real Garant is fundamental for its operational efficiency.

1. **Defining Storage Zones:** Break down your warehouse into logical zones (e.g., Bulk Storage, Pick Face, Quarantine, Returns). This aids in organization and optimization.
2. **Setting Up Locations:** Within each zone, define specific storage locations (e.g., Aisle A, Bay 1, Shelf 3, Bin 4). The granularity here depends on your operational needs and scanning capabilities.
