Tracing Periphery's Sonic Evolution: A Prelude to "All New Materials"

To truly grasp the potential of "periphery all new materials tab," it's essential to look back at their journey so far. Periphery burst onto the scene with their self-titled debut in 2010, immediately establishing themselves as pioneers of the djent movement. Their sound was characterized by heavy, palm-muted guitar riffs, polyrhythmic drumming, and the distinctive vocal stylings of Spencer Sotelo. Albums like "Periphery II: This Time It's Personal" (2012) and "Clear" (2014) saw them refine this formula, introducing more melodic elements and expanding their sonic palette. "Juggernaut" (2015), a sprawling double album, was a monumental undertaking that showcased their ambition and willingness to experiment with longer song structures and more atmospheric passages. This was followed by "Periphery III: Select Difficulty" (2016) and "Periphery IV: Hail Stan" (2019), both of which continued to showcase their growth, incorporating a wider range of influences and pushing their production to new heights. "Hail Stan," in particular, saw them embrace a more raw and aggressive sound at times, while still maintaining their signature technicality. Each of these albums represented a step forward, a willingness to shed the skin of their previous work and explore new creative avenues. Potential sonic directions for the "All New Materials"

Given Periphery's history of exploration, what might "all new materials" entail sonically? The possibilities are vast and intriguing:

Increased use of electronic elements and synths

While Periphery has always incorporated subtle electronic textures, a more prominent integration of synthesizers, sequencers, and electronic percussion could be on the horizon. This could add new layers of depth and atmosphere to their sound, perhaps drawing inspiration from electronic music genres. Think of the rhythmic precision of IDM or the expansive soundscapes of ambient electronic music.

Incorporation of more diverse vocal techniques

Spencer Sotelo is a versatile vocalist, capable of both aggressive screams and soaring melodic passages. "All new materials" could see him exploring even more varied vocal techniques, perhaps incorporating spoken word, more experimental vocal effects, or even collaborations with other vocalists.

Exploration of unconventional song structures

Periphery has never shied away from complex song structures, but this new era could see them deconstructing traditional song formats even further. Expect unconventional arrangements, unexpected tempo changes, and perhaps even extended instrumental passages that eschew typical verse-chorus structures.

Deeper dive into progressive rock and jazz fusion influences

While djent remains a core element of their sound, the band has often hinted at a love for progressive rock bands of the 70s and the improvisational nature of jazz fusion. "All new materials" could see these influences come to the forefront, with more intricate solos, complex harmonic progressions, and a greater emphasis on instrumental interplay.

Experimentation with different tunings and guitar techniques

The "tab" aspect of the phrase strongly suggests a continued focus on guitar work. This could involve exploring new, even more complex, tunings, advanced picking techniques, or innovative uses of effects pedals to create unique guitar textures.

A more stripped-down or minimalist approach (a surprising possibility)

While it might seem counterintuitive for a band known for their complexity, a deliberate move towards a more stripped-down or minimalist approach in certain sections could also be a bold direction. This would allow individual instruments to breathe and highlight the raw power of their compositions, creating a different kind of impact.

The Role of Collaboration and New Influences

"All new materials" could also point towards collaborations with other artists or the incorporation of influences from genres outside of the metal spectrum. Periphery has always been open to cross-pollination of ideas, and this could be an opportunity for them to work with musicians who bring a fresh perspective and introduce new sonic textures to their music. Imagine collaborations with a classical composer, a jazz pianist, or even an electronic music producer. The possibilities are endless and exciting.
