

Murach Html Exercise

Solution

` tags. Students learn to create simple web pages with basic content, including text, headings, and paragraphs. 2. Formatting Text and Paragraphs: This section focuses on styling text using HTML tags like `

` to `

` for headings, `

` for paragraphs, and ``, ``, ```, and ``

for emphasis. Students learn to

create visually appealing and

organized content. 3. Working with

Images and Links: Exercises in this

chapter teach students how to

embed images using the `` tag, set

image attributes like `src` and `alt`,

***and create hyperlinks using the ``
tag. This builds a foundation for
creating engaging and interactive
web pages. 4. Lists and Tables:
These exercises explore the use of ``***

***`` and ``
`` for creating unordered and
ordered lists, respectively, and
the ``***
