

How to get blood out of carpet

Crimson Catastrophe? How to Get Blood Out of Carpet (and Why!)

A single drop of blood on a pristine carpet can instantly transform a room from serene to stressful. That crimson stain, a stark reminder of a mishap, a cut, or even a pet incident, can be surprisingly daunting to remove. But fear not, intrepid carpet cleaners! This comprehensive guide will equip you with the knowledge and steps to tackle blood stains effectively, preserving the beauty and integrity of your home. We'll delve into the science behind blood stains, explore effective removal methods, and address potential pitfalls.

Understanding the Enemy: Blood Stains and Their Properties

Blood, a complex biological fluid, is composed of red blood cells, proteins, and various other components.

These components, especially hemoglobin, are the culprits behind the color and stain persistence.

Hemoglobin, a protein responsible for oxygen transport, reacts with air and surfaces, leading to the formation of permanent stains if not treated promptly. The type of carpet fiber (nylon, wool, polyester, etc.) also influences stain removal efficacy, as does the depth of the stain and its age. **Figure 1: Hemoglobin Structure and Stain Formation** (Include a simple diagram showing the hemoglobin molecule and how it reacts with oxygen, leading to oxidation and staining.)

The sooner you address a blood stain, the better your chances of complete removal. Fresh blood stains are far easier to eliminate than those that have dried. Dried blood stains are more complex to remove and can even require specialized cleaning solutions or professional intervention.

Actionable Steps: Removing Fresh Blood Stains

The best approach for removing fresh blood is a rapid and gentle strategy. 1. Immediate Action: The key is to absorb the blood as quickly as possible. Blot the area gently with a clean, absorbent cloth or paper towel. Avoid rubbing, which can spread the stain and potentially damage the carpet fibers. 2. *Gentle*

Cleaning Solutions: For fresh stains, a solution of cold water and a mild dish soap is often sufficient. Mix a small amount of dish soap with cold water in a spray bottle. 3. Blot and Repeat: Gently blot the affected area with the soap solution. Change the cleaning cloth frequently to prevent spreading. Avoid scrubbing or applying excessive pressure. 4. *Rinse Thoroughly:* After blotting, rinse the area thoroughly with clean, cold water. Again, use a blotting motion. 5. *Dry Thoroughly:* Once the area is damp, blot it again to remove excess moisture and allow it to dry completely. Avoid using a hair dryer or other heat source, which can potentially damage the carpet fibers.

Dealing with Dried Blood Stains

Dried blood stains are more challenging but not impossible to remove. Patience and persistence are key. 1. **Pre-Treatment:** Mix a small amount of enzymatic cleaner or a specialized stain remover specifically designed for blood stains with a small amount of water. Apply this to the dried stain and allow it to sit for about 15-20 minutes to break down the blood proteins. 2. **Spotting and Blotting:** Gently blot the area with a clean cloth or paper towel to remove any excess of the cleaning solution. 3. **Rinse**

and Dry: Rinse the area thoroughly with clean, cold water and blot again. 4. *Repeat as Necessary:* For particularly stubborn stains, you may need to repeat the pre-treatment and blotting steps several times.

Are There Any Disadvantages?

While the process of removing blood stains can be successful, there are potential drawbacks: • Carpet Damage: Aggressive scrubbing or using inappropriate cleaning solutions can damage the carpet fibers, leading to discoloration or permanent damage. •

Water Damage: Excessive water application can saturate the carpet padding and potentially lead to mold or mildew growth if not dried completely. •

Stubborn Stains: Very old or dried-in blood stains may be incredibly difficult to remove completely, even with professional cleaning techniques.

How to Get Blood Out of Carpet: Your Ultimate Guide

Dealing with a blood stain on your carpet can be a stressful experience. Whether it's a minor accident from a cut finger, a nosebleed, or something more significant, the sight of that unmistakable red stain can make your stomach clench. But before you resign yourself to a permanent blemish, take a deep breath. With the right approach and a few common household items, you can effectively tackle even stubborn blood stains and restore your carpet to its former glory. This comprehensive guide will walk you through the best methods for removing blood from your carpet, ensuring you know exactly what to do, step-by-step.

The Golden Rules of Blood Stain Removal

Before we dive into specific solutions, let's establish some fundamental principles that will significantly improve your chances of success. These are crucial for preventing the stain from setting and causing permanent damage:

Act Fast: The Sooner, The Better

This is the single most important piece of advice. Fresh blood is infinitely easier to remove than dried blood. The longer blood sits on your carpet fibers, the more it penetrates and bonds with them, making extraction significantly more challenging. So, if you notice a bloodstain, don't procrastinate. Grab your cleaning supplies and get to work as soon as possible.

Cold Water is Your Best Friend

This is another critical rule. **Never use hot water on blood stains.** Hot water will cook the proteins in the blood, causing them to set into the carpet fibers, making them incredibly difficult, if not impossible, to remove. Always opt for cold or cool water for rinsing and initial cleaning.

Blot, Don't Rub!

Rubbing a blood stain will only spread it further and push it deeper into the carpet. Think of it like trying to erase a pencil mark with a smudge – you're just making a bigger mess. Instead, always use a blotting motion. Press a clean cloth or paper towel onto the stain to absorb the liquid.

Test in an Inconspicuous Area

Before applying any cleaning solution to the main stain, always test it on a small, hidden area of your carpet. This is especially important for colored carpets or delicate materials. You don't want to discover that your cleaning solution has bleached or damaged your carpet after you've already treated the stain.

Work from the Outside In

When treating the stain, start at the outer edges and work your way towards the center. This helps prevent the stain from spreading outwards and creating a larger, more difficult-to-manage area.

Common Household Solutions for Blood Stains

Fortunately, you don't need specialized or expensive carpet cleaning products to tackle most blood stains. Several common household items can be surprisingly effective. Let's explore some of the most popular and successful methods.

1. Cold Water and Dish Soap

This is your first line of defense for fresh blood stains.

It's gentle, readily available, and often all you need.

How to Use:

1. **Blot up excess blood:** Use clean paper towels or a white cloth to absorb as much of the fresh blood as possible.
2. **Mix a solution:** In a bowl, mix a few drops of mild dish soap (like Dawn) with a cup of cold water.
3. **Apply the solution:** Dampen a clean white cloth with the soapy water and gently blot the stain.
4. **Rinse:** Blot the area with a separate cloth dampened with plain cold water to rinse away the soap.
5. **Dry:** Blot the area dry with a clean, dry towel. You can also place a stack of paper towels on the damp spot and weigh it down with a heavy object to absorb moisture.

2. Salt Paste

Salt has absorbent properties that can help lift blood stains, especially when used as a paste.

How to Use:

1. **Blot up excess blood.**
2. **Make a paste:** Mix enough salt with a small

amount of cold water to create a thick paste.

3. **Apply the paste:** Generously apply the salt paste to the blood stain, ensuring it covers the entire affected area.
4. **Let it dry:** Allow the paste to dry completely. As it dries, it will draw the blood out of the carpet fibers.
5. **Vacuum:** Once dry, vacuum up the salt residue.
6. **Rinse and dry:** If any stain remains, follow up with the cold water and dish soap method, and then rinse and dry as usual.

3. Hydrogen Peroxide (3%)

Hydrogen peroxide is a mild bleaching agent that can be very effective on blood stains. However, it's crucial to use it with caution and test it first, as it can lighten some carpet colors.

How to Use:

1. **Blot up excess blood.**
2. **Test:** Apply a small amount of 3% hydrogen peroxide to an inconspicuous area of your carpet to check for colorfastness. Wait a few minutes to see if there's any adverse reaction.
3. **Apply directly:** If the test is successful, carefully pour or spray a small amount of 3% hydrogen peroxide directly onto the blood stain. You should

see it begin to fizz and break down the stain.

4. **Blot:** After a minute or two, gently blot the area with a clean white cloth.
5. **Repeat if necessary:** For stubborn stains, you may need to repeat the application and blotting process.
6. **Rinse and dry:** Once the stain is gone, blot the area with a cloth dampened with cold water to rinse, and then blot dry.

Important Note: Do not oversaturate the carpet with hydrogen peroxide, as it can weaken the carpet fibers over time.

4. Baking Soda Paste

Similar to salt, baking soda is another excellent absorbent that can help lift stains.

How to Use:

1. **Blot up excess blood.**
2. **Make a paste:** Mix baking soda with cold water to form a paste.
3. **Apply the paste:** Cover the stain with the paste.
4. **Let it dry:** Allow the paste to dry completely.
5. **Vacuum:** Vacuum up the dried paste.
6. **Rinse and dry:** Follow with a cold water rinse and

blot dry.

5. Ammonia Solution (Diluted)

Ammonia is a stronger cleaning agent and can be very effective on dried blood stains. However, it has strong fumes and should never be mixed with bleach, as this creates toxic gas. Always ensure good ventilation.

How to Use:

1. **Blot up excess blood (if fresh).**
2. **Test:** Test the diluted ammonia solution in an inconspicuous area.
3. **Mix a solution:** Mix 1 tablespoon of clear household ammonia with 1/2 cup of cold water.
4. **Apply:** Dampen a clean white cloth with the solution and blot the stain.
5. **Rinse:** Blot the area with a cloth dampened with cold water to rinse thoroughly.
6. **Dry:** Blot dry.

Caution: Use ammonia in a well-ventilated area and wear gloves. Never mix ammonia with bleach.

Tackling Dried Blood Stains

Dried blood stains are more challenging but not

impossible. The key is to rehydrate the stain before attempting to lift it.

Rehydrating Dried Blood

Before trying any of the cleaning solutions above, you'll need to soften the dried blood. Here's how:

1. **Dampen with cold water:** Use a spray bottle filled with cold water or a clean cloth dampened with cold water. Lightly mist or blot the dried stain to moisten it. Avoid saturating the carpet.
2. **Let it sit:** Allow the water to soak into the dried blood for a few minutes.
3. **Blot:** Gently blot up any loosened blood with a clean cloth or paper towel.

Once the stain is rehydrated, you can proceed with one of the cleaning methods described earlier, starting with the gentlest (dish soap and water) and escalating if necessary.

Enzymatic Cleaners for Tough Stains

For particularly stubborn or old blood stains, an enzymatic cleaner can be a lifesaver. These cleaners contain enzymes that break down organic matter like blood. They are often found in pet stain removers but

are also effective on general organic stains.

How to Use:

1. **Follow product instructions:** Each enzymatic cleaner will have specific instructions. Read and follow them carefully.
2. **Apply generously:** Typically, you'll apply the cleaner directly to the stain and let it sit for a specified amount of time to allow the enzymes to work.
3. **Blot and rinse:** After the dwell time, blot the stain with a clean cloth and then rinse the area thoroughly with cold water.
4. **Dry:** Blot dry.

Enzymatic cleaners are a great option for getting rid of the odor associated with organic stains as well.

What NOT to Do When Cleaning Blood Stains

We've covered what to do, but it's equally important to know what to avoid. These common mistakes can make the situation worse.

1. **Don't use hot water:** As mentioned, this sets the stain.

2. **Don't rub aggressively:** You'll spread and deepen the stain.
3. **Don't use bleach indiscriminately:** Bleach can permanently damage and discolor carpet fibers. Only use it as a last resort and after rigorous testing.
4. **Don't oversaturate:** Too much liquid can lead to mold and mildew growth and can damage the carpet backing.
5. **Don't mix cleaning chemicals:** Especially avoid mixing ammonia and bleach, as this creates toxic fumes.

When to Call a Professional Carpet Cleaner

While most blood stains can be handled with DIY methods, there are times when calling in the professionals is the best course of action.

1. **Large or old stains:** If you're dealing with a very large blood stain or one that has been there for a long time and has proven resistant to your efforts, professional cleaners have stronger equipment and solutions.
2. **Delicate carpet materials:** If you have a valuable or delicate carpet made of silk, wool, or other

sensitive fibers, it's safer to entrust the cleaning to experts.

3. **Persistent odors:** Sometimes, even after the stain is gone, an odor may linger. Professionals can effectively neutralize these odors.
4. **Uncertainty:** If you're unsure about the best approach or worried about damaging your carpet, a professional consultation can save you time, money, and potential regret.

Conclusion: Blood Stain Removal is Achievable!

Seeing a blood stain on your carpet can be alarming, but with the right knowledge and techniques, it doesn't have to be a disaster. Remember to act quickly, use cold water, and blot gently. Start with the simplest cleaning solutions like dish soap and cold water, and gradually move to more potent options like hydrogen peroxide or enzymatic cleaners if needed. Always test any cleaning solution in an inconspicuous area first. By following these steps, you can effectively tackle blood stains and keep your carpets looking fresh and clean. Happy cleaning!

How to Get Blood Out of Carpet: A Comprehensive Guide to Stain Removal

Few household stains are as dreaded as blood. Whether it's a minor accident, a scraped knee, or something more serious, a blood stain on your carpet can be a source of immediate panic. The porous nature of carpet fibers, combined with the protein-rich composition of blood, makes it notoriously difficult to remove if left untreated. However, with the right knowledge, techniques, and cleaning agents, you can significantly increase your chances of completely banishing that unsightly mark and restoring your carpet to its former glory. This comprehensive guide will walk you through the essential steps and most effective methods for tackling blood stains on carpets.

Understanding the Nature of Blood Stains

Before diving into cleaning methods, it's crucial to understand why blood stains are so stubborn. Blood is an organic stain primarily composed of proteins, iron, and other complex molecules. When blood dries, these components bind tightly to carpet fibers, making them

resistant to simple water-based cleaning.

Furthermore, heat can "set" protein stains, making them even more permanent. This is why one of the golden rules of blood stain removal is to always use cold water, never hot.

The urgency of the situation also plays a significant role. Fresh blood is considerably easier to remove than dried, set-in blood. The longer a bloodstain has been on your carpet, the deeper it will penetrate the fibers and the more challenging the cleaning process will become. Therefore, prompt action is key to successful blood stain removal.

Essential Supplies for Blood Stain Removal

Having the right tools and cleaning solutions at hand will make the process smoother and more effective. Here's a list of items you'll likely need:

1. **Cold Water:** The most crucial element.
2. **Clean White Cloths or Paper Towels:** For blotting and absorbing. White is essential to avoid transferring color to your carpet.
3. **Spray Bottle:** For applying cleaning solutions evenly.
4. **Mild Dish Soap:** A good grease-cutting agent that

can help break down blood components.

5. **Hydrogen Peroxide (3% solution):** A powerful oxidizer that breaks down organic matter and can effectively lift blood stains. Be sure to test in an inconspicuous area first, as it can have a mild bleaching effect on some carpet dyes.
6. **Ammonia Solution (Diluted):** A strong alkaline cleaner that can be effective on stubborn organic stains. *Never mix ammonia with bleach*, as this creates toxic fumes.
7. **Salt Paste:** A simple yet effective absorbent for fresh stains.
8. **Enzyme Cleaner:** Specifically designed to break down organic matter like blood.
9. **Vacuum Cleaner:** For final drying and fluffing.
10. **Spoon or Dull Knife:** For gently scraping away any dried, caked-on blood.
11. **Gloves:** To protect your hands.

Step-by-Step Guide: Removing Fresh Blood Stains

The quicker you act, the easier the stain will be to remove. Fresh blood is your best friend when it comes to carpet cleaning.

Immediate Blotting is Key

As soon as you notice a fresh bloodstain, grab your clean white cloths or paper towels. The goal here is to absorb as much of the liquid blood as possible without spreading the stain. Start from the outside edge of the stain and work your way inward. Apply firm, steady pressure, and replace your cloth or paper towel as it becomes saturated. Avoid rubbing, as this can push the blood deeper into the carpet fibers.

Applying Cold Water and Mild Soap

Once you've absorbed the excess blood, it's time to introduce a cleaning solution. Mix a small amount of mild dish soap (about a teaspoon) with a cup of cold water in a spray bottle. Lightly mist the stained area. Allow the solution to sit for a few minutes to begin breaking down the blood. Then, using a clean white cloth, gently blot the stain again, working from the outside in. You should start to see the stain transferring to your cloth.

Rinsing and Drying

After blotting with the soapy solution, you'll need to rinse the area to remove any soap residue. Lightly mist the area with plain cold water and blot again with

a clean, dry cloth until no more soap or stain is visible. Once you've removed as much moisture as possible, place a thick layer of dry paper towels or a clean, dry towel over the damp spot and weigh it down with a heavy object (like a book). This will help wick away any remaining moisture from the carpet fibers. Leave it overnight if necessary. Once dry, vacuum the area to restore the carpet's texture.

Tackling Dried Blood Stains: A More Intensive Approach

Dried blood presents a greater challenge, but it's not insurmountable. You'll likely need to employ stronger cleaning agents and be prepared for more persistent blotting.

Pre-Treatment: Loosening the Dried Blood

Before applying any cleaning solutions, gently scrape away any raised or crusted blood with the edge of a spoon or a dull knife. Be careful not to damage the carpet fibers. Once you've removed any loose debris, you can begin with your chosen cleaning agent.

Method 1: Hydrogen Peroxide Power

Hydrogen peroxide is a household staple for stain removal due to its oxidizing properties.

1. **Test First:** Before applying to the stain, test a small amount of 3% hydrogen peroxide on an inconspicuous area of your carpet to ensure it doesn't cause discoloration.
2. **Apply Sparingly:** Lightly dampen a clean white cloth with hydrogen peroxide.
3. **Blot Gently:** Carefully blot the dried bloodstain with the dampened cloth. You may see some fizzing, which is the peroxide working.
4. **Patience is Key:** Continue blotting, replacing the cloth as needed. It might take several applications and considerable blotting to lift the stain.
5. **Rinse and Dry:** Once the stain is gone, rinse the area with a damp cloth (cold water) and blot dry thoroughly, using the paper towel weight method described earlier.

Hydrogen peroxide is particularly effective on lighter-colored carpets. For darker carpets, use with extreme caution and thorough testing.

Method 2: The Ammonia Alternative

Ammonia can be a powerful tool for breaking down tough organic stains.

1. **Dilute Properly:** Mix one tablespoon of clear ammonia with half a cup of cold water in a spray bottle.
2. **Test Area:** As with hydrogen peroxide, test this solution in an inconspicuous spot first.
3. **Apply and Blot:** Lightly mist the stain with the ammonia solution. Let it sit for a few minutes, then blot with a clean white cloth.
4. **Work Gradually:** Repeat applications as needed, blotting each time.
5. **Neutralize and Rinse:** Once the stain is removed, it's important to neutralize the ammonia. Mist the area with a solution of one part white vinegar to two parts cold water, then blot thoroughly with a clean, damp cloth. This helps remove any remaining ammonia smell and residue.
6. **Final Drying:** Blot the area dry and use the paper towel weight method for complete moisture removal.

Remember, *never mix ammonia with bleach*.

Ammonia is best suited for sturdy carpet types and requires careful rinsing.

Method 3: Enzyme Cleaners for Organic Stains

Enzyme cleaners are specifically formulated to break down organic matter like blood, urine, and feces. They are often considered the most effective and safest option for tackling stubborn biological stains.

1. **Follow Product Instructions:** Always read and follow the specific instructions on the enzyme cleaner's label, as formulations can vary.
2. **Saturate (as directed):** Some enzyme cleaners require you to lightly saturate the stain, while others are meant for lighter application.
3. **Allow Dwell Time:** Enzyme cleaners need time to work. This can range from 15 minutes to several hours, depending on the product and the severity of the stain. You may want to cover the area with a damp cloth during this time to keep it moist.
4. **Blot and Repeat:** Gently blot the area to lift the dissolved stain. You may need to repeat the application and blotting process for stubborn stains.
5. **Air Dry:** Enzyme cleaners often break down completely as they air dry, leaving no residue.

Enzyme cleaners are an excellent choice for blood stains on all carpet types and are highly recommended for their efficacy and gentleness.

The Salt Paste Method for Fresh Stains

For very fresh, still-wet bloodstains, a simple salt paste can be surprisingly effective at drawing out the moisture and the stain.

1. **Make the Paste:** Mix a generous amount of table salt with just enough cold water to create a thick paste.
2. **Apply to Stain:** Apply the paste liberally to the bloodstain, ensuring it covers the entire affected area.
3. **Let it Dry:** Allow the paste to dry completely. As it dries, it will absorb the blood.
4. **Vacuum:** Once dry, vacuum up the salt paste. You should see a significant reduction in the stain.
5. **Follow Up:** If a faint stain remains, you can then proceed with one of the liquid cleaning methods described above.

This method is particularly useful as an immediate first-response measure.

Dealing with Stubborn or Old Blood Stains

If you've tried the above methods and a faint stain persists, don't despair. You might need to combine

techniques or consider a professional cleaning.

Repeating and Combining Methods

Sometimes, a bloodstain requires multiple treatments. You might find that a combination of methods works best. For instance, you could start with hydrogen peroxide and, if a faint shadow remains, follow up with an enzyme cleaner. Always allow the carpet to dry thoroughly between treatments.

Professional Carpet Cleaning Services

For very old, large, or deeply set bloodstains, professional carpet cleaning services have access to specialized equipment and industrial-strength cleaning solutions that can often remove even the most stubborn stains. If you've exhausted your DIY efforts, calling a professional is a worthwhile investment to save your carpet.

Prevention and Maintenance Tips

While accidents happen, there are ways to minimize the risk and impact of blood stains:

1. **Keep Cleaning Supplies Handy:** Store a small stain removal kit (including cold water, white cloths,

- and a mild cleaner) in easily accessible locations.
2. **Educate Household Members:** Ensure everyone in your home knows the importance of immediate action and the use of cold water for blood stains.
 3. **Regular Vacuuming:** Frequent vacuuming helps remove dust and debris that can otherwise trap spills and make them harder to clean.
 4. **Consider Carpet Treatments:** Some carpet manufacturers offer stain-resistant treatments that can make cleaning spills easier.

Conclusion: Banishing Blood Stains from Your Carpet

Getting blood out of carpet might seem like an overwhelming task, but with the right approach and a bit of patience, it's entirely achievable. Remember the cardinal rule: always use cold water. For fresh stains, immediate blotting and a mild soap solution are your best bet. For dried stains, hydrogen peroxide, diluted ammonia, or enzyme cleaners are powerful allies. Always test any cleaning solution in an inconspicuous area before applying it to the main stain, and work diligently from the outside of the stain inward. By following these detailed steps and utilizing the right cleaning agents, you can effectively remove blood stains and keep your carpets looking pristine and

inviting.

Questions & Answers About how to get blood out of carpet

No	Question	Answer
----	----------	--------

1	Fresh blood on the carpet – what's the quickest way to tackle it?	Act fast! Blot the fresh stain with a clean, dry cloth or paper towel. Avoid rubbing, which can spread the stain. Then, dampen a cloth with cold water and blot again. For tougher stains, a mixture of cold water and a little dish soap can be effective.
2	My dog had an accident, and there's dried blood on the carpet. Help!	Dried blood needs a bit more effort. Start by gently scraping off any excess dried blood with a dull knife or spoon. Then, dampen a cloth with a solution of cold water and a few drops of ammonia (test in an inconspicuous area first!). Blot the stain repeatedly until it lifts. Rinse with clean water and blot dry.
3	Is it safe to use hydrogen peroxide on carpet stains?	Yes, hydrogen peroxide can be very effective, especially on dried blood. Apply a small amount of 3% hydrogen peroxide directly to the stain. Let it fizz for a few minutes, then blot it up with a clean cloth. Rinse with water and blot dry. Always test on an inconspicuous area first to ensure it doesn't bleach your carpet.

4	What's the best natural remedy for blood stains on my rug?	For a natural approach, try a paste of baking soda and cold water. Apply it to the stain, let it dry completely, and then vacuum it up. You can also use lemon juice, but be cautious as it can have a bleaching effect. For tougher stains, a cold water and white vinegar solution (1:1 ratio) can work well.
5	I spilled red wine and then got a nosebleed on the same spot! How do I get both out?	Tackle the blood first while it's fresh. Blot it with cold water. For the wine, you can try blotting with a cloth dampened with cold water and a little salt. For older, set-in stains, a mixture of dish soap and cold water, followed by a rinse, might be necessary. Avoid hot water, as it can set both types of stains.
6	My pet's nail trim went wrong. How do I get small blood spots out of a light-colored carpet?	For small, fresh blood spots, blot immediately with a cold, damp cloth. If that doesn't work, a tiny amount of mild soap and cold water can be applied with a cloth. Gently blot the area until the stain is gone. Rinse thoroughly with clean water and blot dry.

7	I've tried everything, and there's still a faint blood stain. What else can I do?	If home remedies aren't cutting it, consider a commercial carpet stain remover specifically designed for blood or protein-based stains. Always follow the product's instructions carefully and test in an inconspicuous area. For very stubborn or large stains, professional carpet cleaning might be the best option.
8	Should I use hot or cold water to clean blood stains from carpet?	Always use COLD water. Hot water can cook the blood proteins, setting the stain permanently into the carpet fibers, making it much harder to remove. Stick to cold water for all blood stain treatments.
